

IN THE SPECIFICATION

Please replace the paragraph beginning at page 47, line 1, with the following rewritten paragraph:

The window the recording program 113 has the display unit ~~20display~~ 20 display has also disposed therein a button 386 for instructing the start of recording of a content recorded in the CD.

Please replace the paragraph beginning at page 63, line 2, with the following rewritten paragraph:

For example, the package display data 291-3 stores IDs for 10 contents selected based on the history data stored in the history data file 184 and which have been checked out most ~~frequency~~ frequently for the last week.

Please replace the paragraph beginning at page 64, line 13, with the following rewritten paragraph:

Also, when a predetermined image is dragged and dropped to the field 348 with the package name displayed in the field 351 being selected and the content name displayed in the field 352 being not selected, the display/operation instruction program 112 makes the dragged and dropped image correspond to a package corresponding to the selected package name. That is, the display/operation instruction program 112 converts the coding method by which the dragged and dropped image has been coded to a predetermined method (e.g., JPEG (Joint Photographic Experts Group) or the like), adjusts the size of the image (e.g., to 30 pixels by 30 pixels or the like), subtracts the colors (e.g., 256 colors or the like), records the image into the image file 183, and records the name of the image file 183 in which the image has been recorded

as data indicating any image file name in the package display data 211, 251, or 291 corresponding to the package name.

Please replace the paragraph beginning at page 68, line 5, with the following rewritten paragraph:

As shown in FIG. 42, in case the display of the original package has been selected, if names corresponding to two or more content names displayed in the field 352, such as "Heat" and "Sonic", are selected, namely, if contents belonging to the same original package are selected, and the combine command is selected from the edit menu, the content management program 111 combines the contents corresponding to "Heat" and "Sonic", respectively, together to generate a new content, stores it into a new content file 161, and records the content file 161 into the content data base 114.

Please replace the paragraph beginning at page 85, line 4, with the following rewritten paragraph:

At step S154, the display/operation instruction program 112 judges whether a content has been selected. When it is determined that no content has been selected, the operation goes to step S155 where the image file 183 and selected package will be related with each other (that is, the name of the image file 183 in which the content is recorded is recorded as data indicating an image file name in any of the package display data 211, 251, or 291 corresponding to the selected package), and thus the procedure is complete.

Please replace the paragraph beginning at page 92, line 8, with the following rewritten paragraph:

At step S243, the content management program 111 judges whether the number of possible checkouts for the content is equal to the maximum number of possible checkouts ~~for~~ for the content. If it is determined that the number of possible times is equal to the maximum number of possible checkouts, the content management program 111 goes to step S244 where it will judge whether a playback time limit or number of times of playback is set for the content.
